## PRESENT APPOINTMENT

<i>Early Career Research Fellow</i>	<i>2020–present</i>	Imperial College During this fellowship I aim to develop statistical methods for disease mapping that properly accounts for human movement.
<i>Senior Post Doc.</i>	<i>Jan–June 2020</i>	University of Oxford Models of neglected tropical diseases, contributing to software and promoting good research software practices such as version control and unit testing.
<i>Post Doc.</i>	<i>2016–2020</i>	University of Oxford, Malaria Atlas Project I worked as a postdoctoral research scientist in geospatial epidemiology with the <a href="#">Malaria Atlas Project</a> at the University of Oxford. I have made large contributions to the <i>first high resolution, global, space-time</i> estimates of both <i>Plasmodium falciparum</i> and <i>P. vivax</i> leading to two high-profile publications. To this end I have developed new statistical methods that combine <i>machine learning</i> and <i>geostatistics</i> . I have also supervised research assistants on smaller projects, leading to one publication.

## PREVIOUS APPOINTMENTS

<i>Parental leave</i>	<i>2018–2019</i>	Shared parental leave Six months shared parental leave.
<i>Research Programmer</i>	<i>Jan–July 2016</i>	CBER, UCL I was the staff programmer for the Centre of Biodiversity and Environment Research at UCL. I worked on two main projects. I worked with the <a href="#">Madingley Model</a> to enable this ecological model to run on a <i>high performance cluster</i> . Secondly, I translated code from <i>Mathematica</i> to <i>R</i> for analyses of measurements of 3D objects used in <i>paleontological research</i> .

## EDUCATION

<i>PhD</i>	<i>2012–2016</i>	University College London, CoMPLEX <i>The role of population structure and size in determining bat pathogen richness</i> I used <i>network epidemiological models</i> and phylogenetic methods to study the epidemiology of bat-borne diseases with applications to zoonotic surveillance. I conceived the projects and managed my own budget. <a href="#">[pdf]</a> Supervisors: PROF. KATE JONES & DR HILDE HERBOTS
<i>MRes</i>	<i>2011–2012</i>	University College London, CoMPLEX <i>Modelling Biological Complexity · Merit</i> Projects included adapting ' <i>ideal gas</i> ' models to acoustic data, analysing

moment closures for a *pair-approximation* model of plant ecology and applying a novel *machine learning* method to a library of bat calls.

2006–2010      University of Sheffield, Animal & Plant Sciences  
 MBioSci      Zoology · First  
 For my final project I used *wavelet* analysis to study multi-annual *cycles in malaria* incidence in Thailand.

## OTHER PROFESSIONAL ACTIVITIES

Peer Review      Journals Reviewed for:  
 Journal of Theoretical Biology, BMC Infectious Diseases, PLoS Pathogens, Malaria Journal, Methods in Ecology and Evolution, Global Ecology and Biogeography, Ecology and Evolution, Remote Sensing in Ecology and Conservation, ROpenSci, National Academy Science Letters, Journal of Advances in Medicine and Medical Research.

## PEER-REVIEWED PUBLICATIONS

- 2020      **Lucas TCD** (2020) *A translucent box: interpretable machine learning in ecology*. Ecological Monographs. [pdf]
- Lucas TCD\***, Davis E\*, et al. (2020) *Engagement and adherence trade-offs for SARS-CoV-2 contact tracing*. Philosophical Transactions B.
- Lucas TCD**, Pollington T, Davis E, Hollingsworth D (2020) *Responsible modelling: Unit testing for infectious disease epidemiology*. Epidemics. [pdf]
- Lucas TCD**, Nandi AK, et al. (2020) *Improving disaggregation models of malaria incidence by ensembling non-linear models of prevalence*. Spatial and Spatiotemporal Epidemiology. [pdf]
- Nguyen M, Howes RE, **Lucas TCD**, et al. (2020) *Mapping malaria seasonality in Madagascar using health facility data*. BMC medicine, 18(1), 1-11 [pdf]
- 2019      Weiss DJ, **Lucas TCD**, Nguyen M, et al. (2019) *The global landscape of Plasmodium falciparum prevalence, incidence, and mortality 2000–2017*. The Lancet 394, 10195, 322–331. doi: 10.1016/S0140-6736(19)31097-9 [pdf]

2015 **Lucas TCD\***, Moorcroft EA\*, Freeman R, Rowcliffe MJ & Jones KE. (2015) *A generalised random encounter model for estimating animal density with remote sensor data*. Methods in Ecology and Evolution. doi: 10.1111/2041-210X.12346 [pdf]

2013 Walters CL, Collen A, **Lucas TCD**, Mroz K, Sayer CA and Jones KE. (2013) Challenges of Using Bioacoustics to Globally Monitor Bats. in *Bat Evolution, Ecology, and Conservation*. Springer New York. 479-499.

\* Co-first authors.

#### GLOBAL BURDEN OF DISEASE PUBLICATIONS

2020 GBD 2019 Diseases and Injuries Collaborators (2020) *Global burden of 369 diseases and injuries in 204 countries and territories, 1990–2019: a systematic analysis for the Global Burden of Disease Study 2019*. The Lancet, 396 [pdf]

2018 GBD 2017 Risk Factor Collaborators (2018) *Global, regional, and national comparative risk assessment of 84 behavioural, environmental and occupational, and metabolic risks or clusters of risks for 195 countries and territories, 1990–2017: a systematic analysis for the Global Burden of Disease Study 2017*. The Lancet, 392 [pdf]

GBD 2017 Disease and Injury Incidence and Prevalence Collaborators (2018) *Global, regional, and national incidence, prevalence, and years lived with disability for 354 diseases and injuries for 195 countries and territories, 1990–2017: a systematic analysis for the Global Burden of Disease Study 2017*. The Lancet, 392 [pdf]

GBD 2017 DALYs and HALE Collaborators (2018) *Global, regional, and national disability-adjusted life-years (DALYs) for 359 diseases and injuries and healthy life expectancy (HALE) for 195 countries and territories, 1990–2017: a systematic analysis for the Global Burden of Disease Study 2017*. The Lancet, 392 [pdf]

GBD 2017 Mortality Collaborators (2018) *Global, regional, and national age-sex-specific mortality and life expectancy, 1950–2017: a systematic analysis for the Global Burden of Disease Study 2017*. The Lancet, 392 [pdf]

GBD 2016 Healthcare Access and Quality Collaborators (2017) *Measuring performance on the Healthcare Access and Quality Index for 195 countries and territories and selected subnational locations: a systematic analysis from the Global Burden of Disease Study 2016*. The Lancet, 391 (10136) [pdf]

2017 GBD 2016 Disease and Injury Incidence and Prevalence Collaborators (2017) *Global, regional, and national incidence, prevalence, and years lived with disability for 328 diseases and injuries for 195 countries, 1990–2016: a systematic analysis for the Global Burden of Disease Study 2016*. The Lancet, 390 [pdf]

GBD 2016 Causes of Death Collaborators (2017) *Global, regional, and national age-sex specific mortality for 264 causes of death, 1980–2016: a systematic analysis for the Global Burden of Disease Study 2016*. The Lancet, 390 [pdf]

GBD 2016 DALYs and HALE Collaborators (2017) *Global, regional, and national disability-adjusted life-years (DALYs) for 333 diseases and injuries and healthy life expectancy (HALE) for 195 countries and territories, 1990–2016: a systematic analysis for the Global Burden of Disease Study 2016*. The Lancet, 390 [pdf]

GBD 2016 SDG Collaborators (2017) *Measuring progress and projecting attainment on the basis of past trends of the health-related Sustainable Development Goals in 188 countries: an analysis from the Global Burden of Disease Study 2016*. The Lancet, 390 [pdf]

#### PEER-REVIEWED CONFERENCE PROCEEDINGS

- 2018 Law HC, Sejdinovic D, et al. (2018) *Variational learning on aggregate outputs with Gaussian processes*. Advances in Neural Information Processing Systems [pdf]

## INVITED CONFERENCE TALKS

- 2017 *Predicting malaria risk from diverse and multilevel data*.  
Plenary at SDCS2017, Springer

## TEACHING AND SUPERVISION

- 2019 · Co-wrote and ran an afternoon workshop. "Advanced Statistical Modelling with TMB".
- 2019 · Thesis committee for PhD student Dan Pfeffer.
- 2018 · Supervised two research assistants on side projects resulting in one publication (pdf).
- 2017 · Wrote and gave a two day workshop 'Geospatial statistics with R and INLA' at UiTM, Malaysia.
- 2015 · Demonstrator for reproducible species distribution modelling workshop run by Quantitative Ecology special interest group at BES.
- 2013–2014 · Online tutor for SysMIC, a course for teaching quantitative skills to biologists.

## COMPUTATIONAL SKILLS

Statistical methods	Geospatial statistics, machine learning, Bayesian inference.
Languages	R (expert level), Python, Matlab, Mathematica, Java, SQL.
Other	Experience in R package development, Git/Github, unit testing, continuous integration, shell/ssh and high performance computing.

## REFEREES

PROF. PETER GETHING	Oxford
Professor of Epidemiology	United Kingdom
Big Data Institute	OX3 7LF
University of Oxford	

PROF. KATE JONES  
Chair of Ecology and Biodiversity  
Centre for Biodiversity and Environment  
Research  
University College London

Gower Street  
London  
United Kingdom  
WC1E 6BT
